Sierra Stall Mats
Sierra Traffic Safety Cones
Sierra Weed Control

Sierra Weed Control eliminates the need for supplemental water from irrigation providing a sustainable aesthetic landscape with tremendous benefits. The ground preparation is graded; weed fabric is installed to stop unwanted weeds and grasses; the tire-derived material made of 100 percent California recycled scrap tire rubber nuggets is spread; and the surface areas is covered by a protective emulsion coating. The weed abatement system provides superior performance, durability, reduces fire hazards created by vegetative growth and provides public safety.

APPLICATIONS

- Vegetation Management
- Highway Medians
- Airports
- Residential
- Commercial & Industrial

BENEFITS

- Permeable Surface
- Water Conservation
- Eliminate Spraying Herbicides
- Xeriscaping
- Minimal Maintenance
